

Honeywell Galaxy Dimension panels, native inside Milestone XProtect

The Miletech Galaxy Plugin brings Honeywell Galaxy Dimension intrusion panels into the XProtect ecosystem. Groups, zones and outputs become native XProtect items on Smart Client maps, panel events feed the Rule Engine, and operators arm, disarm and control outputs without leaving the video platform.

Plugin features

Arm & Disarm Groups

Set, part-set or unset any group from the Smart Client, including map context menus.

Smart Client Maps

Drag panels, groups, zones and outputs onto XProtect maps, with live state icons and right-click control.

Real-Time Alarms

Zone activations, tampers and panel faults stream as XProtect events for rules, recordings and alerts.

Output Control

Activate or deactivate outputs from the Smart Client to trigger sirens, locks, lights and other devices.

Zone Monitoring

Every zone state: open, closed, tamper, fault, bypassed. Contact, PIR, fire, gas, panic and many more.

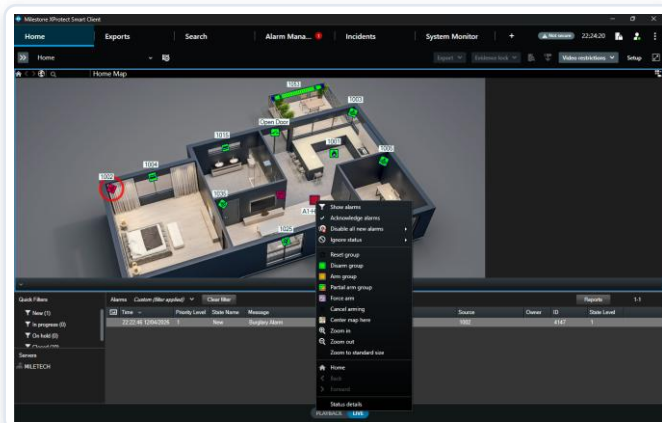

Auto-Import Configuration

Groups, zones, outputs and descriptions imported from the Remote Servicing Suite XML export.

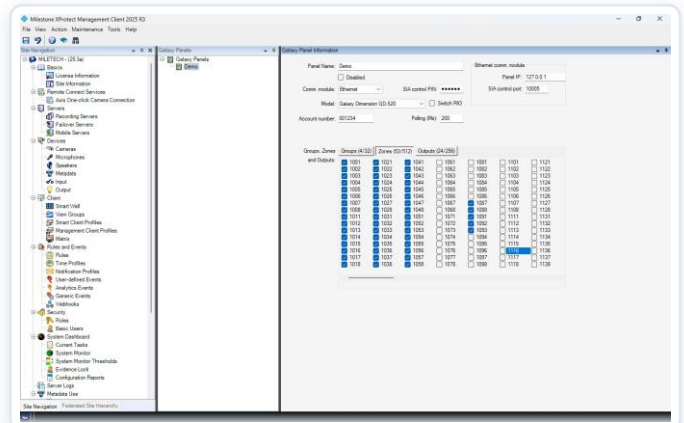

Built on the Milestone Integration Platform (MIP) SDK, no middleware, no external services.

Technical details

Communication

SIA over TCP/IP through the Ethernet module, with automatic session management, reconnection logic and configurable polling intervals.

XProtect integration

Event Server plugin for real-time polling, a Management Client configuration node, Smart Client map icons and full Rule Engine support.

Requirements

XProtect 2022 R1 or later, Windows Server 2019 or 2022, and a Galaxy Dimension panel with the E080 Ethernet module and SIA enabled.

Licensing

Per-controller licence tied to the machine hardware. Free 30-day trial, activation by licence file, no internet needed on the server.

Supported Galaxy Dimension models

Model	Zones	Groups	Outputs	Ethernet	RS-232
GD-48	48	8	16	Available	Coming soon
GD-96	96	16	32	Available	Coming soon
GD-264	264	32	130	Available	Coming soon
GD-520	520	32	260	Available	Coming soon
Flex 20	20	4	8	Coming soon	Coming soon
Flex 50	50	8	16	Coming soon	Coming soon
Flex 100	100	16	32	Coming soon	Coming soon

Free 30-day trial, all features included.
